Memorandum

Date: July 1, 1976

To: Dr. Robert H. Woodroof  
Mr. William M. Fortune

From: Mr. Stuart Smith *JS*

Subject: Edmonds Elementary School

I would suggest that we notify Mr. Rod Garretson, Parks and Recreation Department of the City of Edmonds, that:

1. We do not have voter approval to sell Edmonds Elementary and it will be unlikely that this can be obtained until at least November.
2. It would seriously reduce the value of Edmonds Elementary School, to a prospective buyer, to sell the playfield separately. (I would advise against any attempt to sell separately.)

SUPT. OFFICE  
DISTRICT 15

Dr. Robert H. Woodroof, Superintendent  
Edmonds School District #15  
3800 - 196th Street S.W.  
Lynnwood, Washington 98036

Dear Dr. Woodroof:

The Parks and Recreation Department of the City of Edmonds desires to provide a lawn bowling facility for the residents of the area, primarily the senior citizen residents. The most ideal piece of land, from our viewpoint, is the grass field immediately to the east of the vacated Edmonds Elementary School.

We are gathering data in preparation for a proposed park improvement bond issue this November. We need to know whether or not this parcel of land would be sold by the Edmonds School District as a parcel separate from the remainder of the elementary school site. And, of course, a determination of that cost as soon as possible.

Would you please determine if the grass field would be sold to the City? I would appreciate this information by August 7th, if possible.

Respectfully,

Rod Garretson, Director  
Parks and Recreation Department
